SUMMARY

An experienced software engineer with a track record of delivering scalable, cloud first, web and mobile applications. I have a keen interest in blockchain technologies and the web3 space as a whole.

SKILLS

React, React Native,Typescript, ethersjs, web3js, solidity, hardhat, GraphQL, NodeJS, NextJS, CSS-in-JS, Version Control, Express, REST API, AWS (EC2, S3, Route53), Firebase, Docker

WORK EXPERIENCE

Co-Founder & CTO - *Let's Eat*

- Contributing in all stages of the technical product life cycle, including architecture and planning, development, testing and deployment, and ongoing maintenance.
- Closely worked with tech leads to address tech debt, ensuring high-quality solutions were delivered in a timely manner while upholding company SLAs.
- Identified and resolved any issues relating to hardware, software, and network infrastructure that were slowing down the operations of an organisation serving thousands of customers each year.

Software Engineer - *Library of Things*

- Helped scale the platform from 1 site to 3 sites in 6 months through building a custom CMS that automated a lot of content across various locations and channels.
- Built out internal tools and protocols for a SaaS, supporting multiple admin permissions and levels.
- Supported development team in creating pipelines for continuous integration and continuous delivery using Gitlab alongside Docker.

Software Engineer - *MTC Media*

- Completed development of multiple e-commerce sites, applying expertise in UX, frontend development, and MTC's proprietary content management system to deliver pixel perfect designs for a variety of clients.

Software Engineer - *Bradbourne Digital*

- Led a small team of developers to create scalable cloud first web and mobile applications. Reviews, mentoring, sprint planning and retros were all part of my responsibilities.
- Delivered a fully-functional, React Native survey application promoting sexual and relationship education for students in Asia. The app is now rolled out across two continents, with multi-lingual support and used by thousands of students daily.
- Regularly attended training courses and conferences. Frequent code reviews with the CTO focussing on fast tracking my development skills

Mentor - *Coding Coach/The Mentoring Club*

- Worked with new developers to break into the software industry, providing mentorship and training on topics including React Hooks, state management, and portfolio development

Web Developer - *Focus Digital*

- Designed and built simple websites for small to medium sized companies using WordPress custom themes.
- Manipulated custom theme with CSS.
- Worked with a small freelance team including designer, developer, photographer and a project manager.
- Used version control within the team to collaborate and release new features.
